

## Lighting

### Single Light

This is a perfect starter light kit - and it may be all you ever need. Just get the placement right and this light will make you look fabulous.

**\$27**

<http://amzn.to/2fPAbP7>

### Double Light Kit

This is a perfect starter light kit - and it may be all you ever need. Just get the placement right and this light will make you look fabulous.

**\$140**

<http://amzn.to/1UyYeCY>

### Light Bulb (Daylight Color)

Perfect for those lamps that you see in the background of your shot - or just for adding a little fill light on the dark side.

**\$7**

<http://amzn.to/2tar8CZ>

## Audio

### Acoustic Foam

The acoustic foam panels stop sound from bouncing and creating echo in your videos. You could hire a sound engineer, or you could place these on any expanse of hard surface.

**\$25**

<http://amzn.to/2rRCzM6>

### Acoustic Foam Corners

Those sound engineers say that having bigger foam in the corners of your room is important for trapping low pitched sounds. So add these to your corners.

**\$17**

<http://amzn.to/2rR0lYx>

### Wired Lavalier Microphone

Attaching this microphone to your shirt is almost guaranteed to improve your sound.

**\$15**

<http://amzn.to/2dZ5ZS6>

### Extension Cable for Wired Lavalier

If you want to use the above lavalier, but you need a longer cord, use this to get further from your camera.

**\$12**

<http://amzn.to/2n3DGJ8>

### Wireless Lavalier Microphone

If you need to be completely disconnected from wires, this is a great wireless microphone. It works reliably up to 30 feet from your camera - and you probably never need to be that far away.

**\$100**

<http://amzn.to/2pnii2w>

### Adapter for Wireless Lavalier

If you want to use the above wireless lavalier with your iPhone, you'll need this adapter.

**\$30**

<http://amzn.to/2oxYQ3U>

## Camera

### Tripod

You'll need something to hold your camera steady. That is imperative for professional looking video. This tripod is basic, but it's tall enough for most people, light weight and inexpensive.

**\$24**

<http://amzn.to/2nxG73p>

### Tripod adapter

You'll need an adapter to connect your iPhone to any tripod. You might already have one if you have a selfie stick - some are removable.

**\$8**

<http://amzn.to/2n2EtdN>

## iPhone Battery

iPhones batteries don't last long when shooting video. This is a great option for keeping your charged on the go. Use the cable that came with your phone to plug it in.

**\$18**

<http://amzn.to/2t7ZxTc>

## Clip on Lens

If you need to a wider angle or you need to get really close to see details, then this kit will adjust your lens.

**\$15**

<http://amzn.to/2fwyXMJ>

## Teleprompter

## Teleprompter

If you want to save a lot of time by reading your script while looking into the lens, then you'll need a teleprompter

**\$160**

<http://amzn.to/21DumKR>

## iPad for Teleprompter

Buying the teleprompter? You'll need a second iPhone or iPad to run the teleprompter software. If you don't have an old one, or can't borrow your kid's, then slurge and get a brand new one!

**\$500**

<http://amzn.to/2tbpaCN>

### iPhone to Mac Cable

If you are using the teleprompter, and filming alone, you'll need to see your iPhone screen on your Mac. You can't use the selfie side camera when using a teleprompter - so you need a way to see yourself when setting up the shot.

**\$15**

<http://amzn.to/2gMZ9Tx>

### Prompt Smart Software

This is the software you'll use to display your script on your teleprompter. It will mirror the text (your teleprompter will "unmirror" it. And it will scroll the text as you speak.
