## Day 3 (Wednesday) Focus on Editing

### Welcome Back

### Recording for the edit

Benefits of editing

- Faster recording time
- More interesting video
- More professional video
- More information / value for viewer

Memorizing the script?

### Setting up equipment / teleprompters

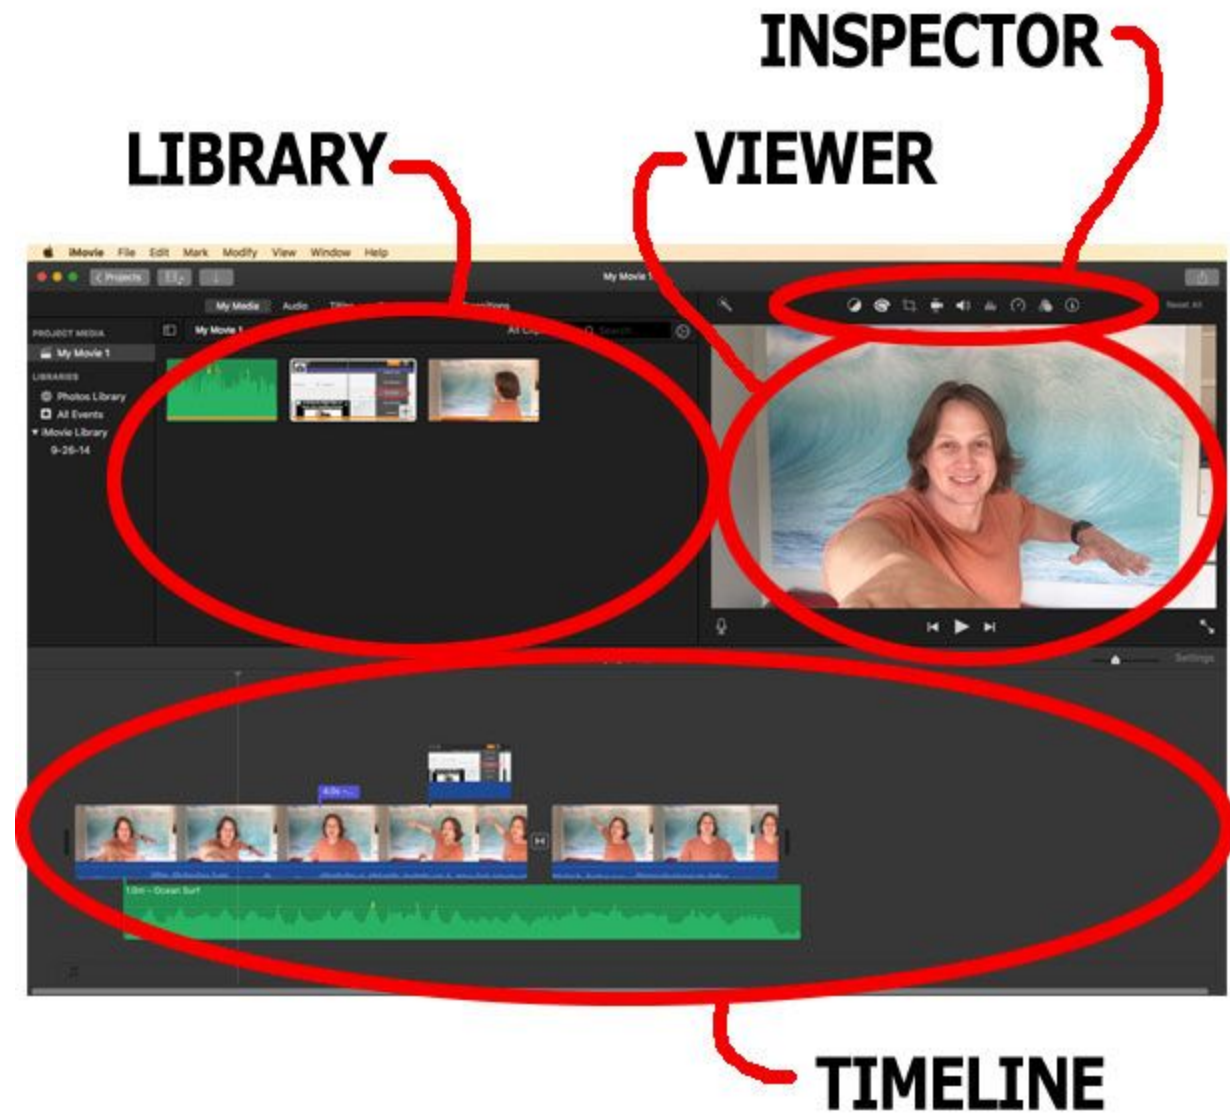

Use a teleprompter to project your script (or a friendly face) in front of the camera lens. I prefer the [Caddie Buddy Teleprompter](#) and the [PromptSmart](#) app

### Basic editing on your iPhone

### Download your footage to your computer

- iPhone/Mac Connect iPhone to Mac with USB cable, then open Image Capture
- iPhone/PC Connect iPhone to PC with USB cable, open My Computer
- Android/Mac Download [Android File Transfer](https://www.android.com/filetransfer/) <https://www.android.com/filetransfer/>,  
Connect Android to Mac with USB cable and open Android File Transfer.
- Android/PC Connect Android to PC with USB cable, tap “USB for...” notification

# How to edit video with iMovie

## TIMELINE DETAIL

## **Homework**

Create a project file for your video in iMovie, Vegas Studio or Movie Maker

Edit your video to remove extra footage or increase viewer interest

Add at least three cuts / transitions

Add some text onto your video

Add a photo onto your video

Export your video as an mp4 or mov file and put it on your desktop
